

Main value streams

Customer problem	The input to us	Our work	Our output	Impact for customer	Value for us	Value for overall purpose
course does not have enough modern PDS	Passive: course description, past evals, all current course material Active: interview with course responsible	Structured AI analysis Human in the loop Commitment to upgrade plan	Upgrade plan Assigned PDS resource AI generated inspiration material PDS resource and CL onboarded to instructure and flow	My course has been supercharged with DS, AI with good didactics		The pharma education is one step closer to the future
Staff needs new skills				Clarity of what and how I should learn		
We need a new course with lots of PDS	Often CPDSE would have the idea ourselves			Pharmaschool as a cool offering		Students come out with state-of-the-art skills from the course
My research group wants make better use of PDS	Passive: lab website, current grants, publications Active: PI to fill questionnaire	Run research DS strategy workflow Conduct 2 workshops	Recommendation document with commitments	Concrete commitments to improve	Portfolio of happy customers	Learn about practical challenges More PDS in research helps on the longer term
I have a specific research question and need help	Structured Interview with AI to assess needs and current competencies Live interview with human Workplan and agreement	According to workplan and agreed time allocation	As agreed in workplan	DS Research problem solved. Learned something	Portfolio of happy customers	A little bit more pharma data research

Our Reference Models (the CPDSE advantage and consistency)

Data science	Pharma	Education
Data Science Competency Model	PharmaValue ChainModel	Training from the Back of Room

To improve capabilities in *PharmaValueChain* we train/catalyze *Data Science Competencies* using *Training From the Back of the Room Practices*
